

TIRE / RIM COMPATIBILITY CHART

This chart is based on the official ETRTO standards, which are the result of extensive testing by the entire bike industry. The upper limit of rim width is a bit conservative, because the chart dates from a time before wide rims became popular.

Tire Width	Rim Width (Inside)*
26 mm	14 - 17 mm
28 mm	15 - 19 mm
32 mm / 1.25"	15 - 20 mm
35 mm	17 - 22 mm
38 mm	17 - 23 mm
42 mm / 1.8"	17 - 24 mm
44 mm	17 - 25 mm
48 mm	17 - 27 mm
55 mm / 2.2"	17 - 29 mm

* rims with hooked sidewalls; there are no standards for hookless rims yet.
